Quality, Dependability and Reliability

An important aspect of Avtech's audio systems are the speakers. Avtech offers a full range of speaker options, specifically tailored for installation into the target aircraft. Avtech's speakers are wound and fabricated to Avtech's specifications and feature, high efficiency and low weight as well as flame retardant speaker cones. Speakers can be raw speakers with crimp style interconnections or enclosed speakers with interface connectors, dependant upon customer preference.

COCKPIT SPEAKERS

Dependant upon customer preference, Avtech can supply raw speakers, with crimp style contacts or fully enclosed speakers with integrated volume controls and connectors.

- Custom wound to meet the impedance and power specifications of the speaker amplifier
- Flame retardant speaker cones
- Options available for enclosed or raw speakers with crimp style contacts
- Options available with integrated speaker volume control
- Power amplification is provided via Avtech's Audio Management Unit
